

R2C - YOUR SOFTWARE SOLUTION FOR BUSINESS CONTINUITY MANAGEMENT

RESILIENT PROCESSES AND GUARANTEED BUSINESS CONTINUITY

Disruptions, cyberattacks, and new regulatory standards are increasing the pressure on companies. At the same time, there is a growing need to remain operational even in critical situations. This is where Business Continuity Management comes in. You identify your critical processes early on, realistically assess the default risks, and ensure that you can strategically resume operations in the event of an emergency. With R2C, you implement your Business Continuity Management in a structured and transparent manner. You integrate it into your existing GRC framework and align with recognized standards such as ISO 22301 and BSI 200-4.

BCM FOR ORGANIZATIONAL RESILIENCE

ISO 22301 / BSI 200-4

How BCM supports you

- You strengthen your organization's resilience
- You implement your BCM processes in a structured and audit-proof manner
- You reduce downtime and get your systems back up and running faster
- You create clear and reliable decision-making criteria for your management

Structured BCM processes for maximum resilience

R2C enables you to centrally and consistently map all relevant BCM elements:

- Identify and prioritize critical business processes
- Conduct structured Business Impact Analyses (BIA)
- Define and manage recovery strategies and emergency plans
- Map dependencies transparently (processes, resources, IT systems)
- Document emergency and recovery plans centrally

Ensure stable business processes even in crisis situations.

Integration into your GRC platform

Thanks to the shared database, BCM becomes an integral part of your GRC strategy:

- Link critical processes to risks, controls, and actions
- Integrate BCM into your ISMS to ensure the continuity of your IT services
- Link BCM to your risk management for a consistent assessment of impacts
- Create a unified data foundation for audits and regulatory reporting

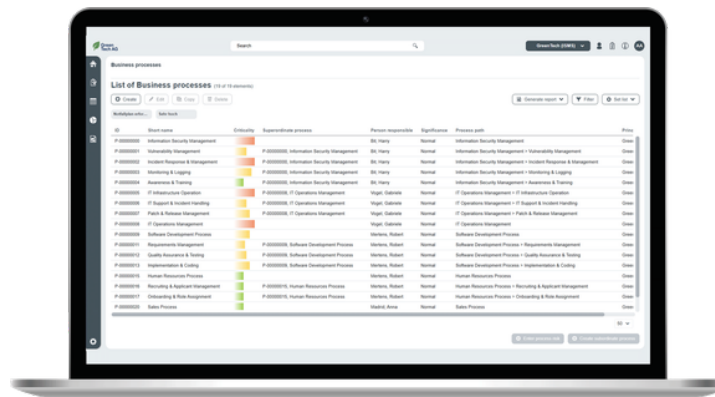

This reduces redundancies and ensures a consistent, cross-module assessment.

Transparency & control at a glance

With our integrated reporting and dashboard features, you can keep track of everything at all times:

- An overview of critical business processes and their recovery status
- Monitoring of Recovery Time Objectives (RTO) and Recovery Point Objectives (RPO)
- Status tracking of emergency actions and continuity plans
- Audit-proof documentation of all BCM activities

Provide your management team with a reliable basis for decision-making, even in a crisis.
