

R2C - YOUR SOFTWARE SOLUTION FOR INFORMATION SECURITY & DATA PROTECTION

MAXIMUM SECURITY - SIMPLE AND EFFICIENT IMPLEMENTATION

With R2C, you get a powerful software solution that combines **information security**, **data protection**, and **BCM** in a single integrated system. From compliance with international standards such as ISO 27001 and NIS2 to the implementation of the EU GDPR and BSI 200-4 – our solution offers you everything you need for modern, certifiable management: intuitive, flexible, and secure.

DATA PROTECTION

EU GDPR / NIS2

Compliance with the EU GDPR has never been easier: R2C supports you in the structured management of processing activities, data protection impact assessments, and technical and organizational actions. Thanks to the shared database with the ISMS, you can save time and avoid duplicate data maintenance—efficient, flexible, and tailored to your requirements.

GDPR compliance in a snap

R2C makes it easier for you to comply with the EU GDPR. Manage processing activities, data protection impact assessments and technical actions presented clearly and in a structured manner—without any extra effort.

- **Directory of processing activities in accordance with Art. 30 of the GDPR, with customizable form fields**
- Support with **data protection impact assessments** in accordance with Art. 35 GDPR

No duplicate data, just full efficiency

Thanks to the **shared database** for data protection and information security, **redundant maintenance** of business processes, assets, and measures is **avoided**. This allows you to save time and resources.

- **Unified database for ISMS and data protection** to avoid redundant data maintenance
- **Automatic linking** of processing activities, risks, and actions

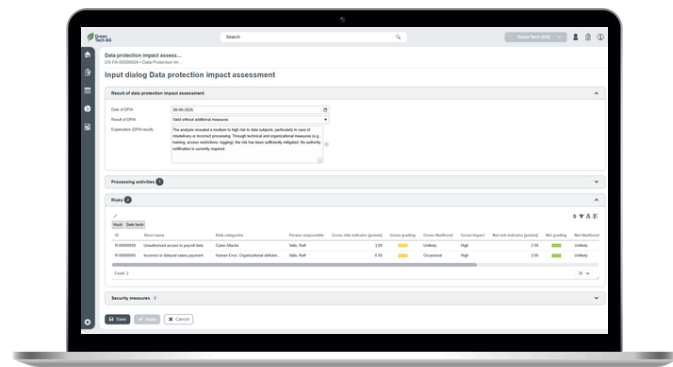

Flexibility to meet your needs

The solution adapts to your needs: With customizable input screens and reports, you remain agile and can easily respond to changing requirements.

- Customizable input forms for specific requirements (**customization**)
- **Flexible import and export of data**, e.g., catalogs or inventory databases

Data protection has become a legal requirement and a crucial factor in your company's reputation. Anyone who takes data protection seriously protects not only data but also the trust of customers and partners.

With R2C, you can implement the EU GDPR efficiently and in full compliance with the law, minimize liability risks, and strengthen your business. Data protection stands for security, integrity, and the responsible handling of sensitive information—for your customers as well as your employees.
