

INSIGHTS - REPORTS & DASHBOARDS THAT SIMPLIFY YOUR WORK

TRANSPARENT ANALYSIS FOR INFORMED DECISIONS.

Insights is the central reporting and analysis cockpit of your GRC platform. Your data from all integrated modules is consolidated into meaningful reports, easy-to-understand dashboards, and concise management analyses. This allows you to identify correlations at a glance and create a reliable, cross-module basis for informed decisions, effective governance, and reliable audits.

AT A GLANCE

What are the benefits of Insights?

- Get predefined reports at the click of a button
- Use custom templates for full CI compliance
- Automatically send dashboards and reports at defined intervals
- Analyze data across systems instead of in silos
- Use flexible filtering and analysis functions
- Get a consolidated view of risks, measures, controls, and compliance status
- Access a unified database across all connected modules
- Export traceable, audit-proof reports
- Create reports and dashboards tailored to specific audiences without media discontinuity directly in R2C

The Insights reporting and dashboard functions can be used independently of individual GRC modules and grow with your organization.

Who is Insights designed for?

- Companies with multiple GRC modules and extensive reporting needs
- Organizations with management, review, and audit requirements
- Teams looking to replace manual analyses and Excel reports

Insights makes reporting clear, comparable, and helpful for decision-making.
